GENERAL CATALOGUE 2022

Forget the boring stainless steel, welcome the purity of the colour.
New solutions for the design of kitchen environments with the Nodor range.

The stylish environments are constantly renewed and to respond to this constant evolution, the exclusive ranges of Nodor **SNOW-WHITE** and Nodor **DARKBLACK** are born.

Black is back. Its minimalist and elegant design matches with all types of environments, providing a sophisticated look to each kitchen with its chrome details and its finishes in pure black glass.

Black or White. The new Nodor appliances have a captivating aesthetic without neglecting our responsibility commitment to the environment, which starts during the production process and is translated into low-energy consumption classifications. With the advantage of being able to choose between pure white crystal or pure black crystal.

The Nodor appliances are different, we like the details, we appreciate the design and technology because it is in our DNA. That's why the **COPPER** range is born, unique appliances, designed to satisfy the most demanding chefs for their technology and ease of use. It was never so easy to cook as it is with the new Copper Nodor range.

For those looking for something different, for those who do not follow the rules, for those with a non-conformist nature, for those who want to be different, the new Nodor **COLOURDOT** range is born, providing a modern and lively touch to your kitchen.

For those looking for an unmistakable design inspired by the 50 or a personal touch to their home without forgetting the technological advantages that Nodor has been providing since 1977, the new Nodor **RETROLINE** range is born.
